SILLO

BULK BIN OPTION

The Bio-Burner **Multi-Fuel Multi-Day** Fuel Bin Systems all have the same non-bridging fuel feed design. Each of the Bulk Bin systems now have the option of using standard “**silo**” side walls rather than plywood.

Each of Bulk Fuel Bin Systems by LEI Products ship with all mechanical parts and plans required for assembly. Side walls & floor are not included as to save the end user on shipping costs and flexibility to choose which design best fits their application.
